## From the Editor

---

This is the twentieth issue of *Current Research in the Pleistocene* and the first to be published by the Center for the Study of the First Americans from our new home at Texas A&M University. With the move to Texas A&M, the Center was able to reorganize and hire a new office manger—Laurie Lind. Through her organizational skills and hard-working nature, we have been able to get *CRP* back on a predictable timetable for publication.

With the next issue of *Current Research in the Pleistocene*, we would like to increase the subscription base for *CRP*. *Current Research in the Pleistocene* is currently sold like a book that comes out once a year. However, *CRP* is a journal and as such we would like to have it on a subscription basis. In the back of this volume you will find a subscription form. I encourage you to fill it out and send it to us for your advance subscription to volume 21, which should be available in December 2004. This will help the Center to determine how many copies of *CRP* to print, and you will receive volume 21 at a discounted price as soon as it is available.

Volume 20 also represents my first and last appearance as editor of *CRP*. I basically saw myself as editor-in-transition to keep *CRP* on track for 2003 while we organized the Center and before we could find a new editor to shepherd *CRP* into the future. Ted Goebel, a well-known First Americans researcher at the University of Nevada, Reno, and Executive Director of the Sundance Archaeological Research Fund, has agreed to take over the editorship of *CRP*. Under his guidance, I am sure *CRP* will continue to grow and prosper.

Good luck to all in your research endeavors and send us your manuscripts.

Michael R. Waters
